**“READY FOR THE JOB
WITH MY TERRAX”**

Terrax: professional equipment

Professionals can rely on the quality of the Hulco Terrax plant trailers and load them to the max. A challenge the Terrax is built for. The strong chassis with its many tubular profiles creates a excellent loading floor support. The low floor height in conjunction with the robust tailgate ramp, the shovel-support, multiple tie-down points and integrated lights makes the Terrax a professional tool. Ideal for excavators, platform machines, and shovels.

Plant trailers Terrax-Basic

Hulco has established a professional line of plant trailers. The Terrax-Basic models have been specially developed for less heavy transport. The Terrax-Basic is equipped with a high grip plywood loading floor. Ideal for transporting ATV's, quads, garden machines and lawn mowers.

**“LOADING AND UNLOADING
THE TERRAX IS TIME SAVING”**

TERRAX-Basic; a sophisticated design

The Terrax-Basic is based on a robot-welded chassis that's fully galvanized. The strong tailgate ramp with a height of 100 cm expands the entire floor width. With a loading floor height of only 32 cm, driving on and off the machine transport is a piece of cake. The lighting, axles, coupling and brake-system are of premium quality. You will experience years of pleasure with this maintenance-friendly plant trailer!
